and barbering industries

NHBF Health and safety toolkits and packs - nationally recognised

Thank you for ordering an NHBF health and safety toolkit or pack. Our health and safety materials have been given the status of 'assured advice' by Surrey and Woking Council as our Primary Authority partner.

This means that once you have fully implemented the contents of the toolkit, you can be confident that you are complying with health and safety legislation. The other benefit of Primary Authority is that this 'assured advice' is recognised nationally by local authorities and other regulators across the UK.

Primary Authority does not prevent legal action being taken where advice and guidance has not been followed or ignored. But if you have followed the assured advice, it is extremely unlikely to result in legal action.

Data sharing

If you consented to the NHBF sharing your data with the Department for Business and Trade (DBT) we will provide them with the following information upon request:

- The name of your business;
- The limited company name (if applicable)
- Your name, address, email address
- When you bought your NHBF health and safety pack.

This is so regulatory authorities such as local authorities and their environmental health teams know which NHBF Members are covered by assured advice.

A handwritten signature in black ink that reads 'Richard A. Lambert'.
